**CAREFULLY FORMULATED FOR ALL AUTOMATIC
GLASS WASHING MACHINES**

Carefully formulated products for the food, beverage and catering industries

ULTRAGLIDE

Cabinet Glasswash

Ultraglides is a pH-neutral, foam-free detergent for the careful cleaning of glasses in automatic and semi-automatic machines.

Ultraglides formulation ensures excellent cleaning power with no foam, yet is also gentle to glassware and will not cause blooming.

Ultraglides is formulated ideally for the food, beverage and catering industries and contains a blend of inorganic phosphates and threshold agents and a special new sequestrant, which is made from natural, replaceable and sustainable raw materials.

In addition this new sequestrant is readily biodegradable and has excellent eco-toxicological properties.

Directions for use: Use at 0.2 – 0.5% v/v through an auto-dosing pump directly into the machine.

SPECIFICATIONS:

| | |
|-------------|----------------------------|
| Colour: | Very pale yellow liquid |
| Odour: | None |
| pH (1% v/v) | 8.3 |
| Pack Size: | 2 X 5 litre 4 x 5 litre |

REVIVE

Glass Refurbishment Powder Glass Cabinet Cleaner & Sanitiser

Revive is a fully-formulated powder detergent for occasional use as a boost on glassware and in glasswashing machines.

Revive removes deposits which have slowly built-up in automatic glasswashing machines, due to their continual use and soil loading, and also blooms on the glassware itself.

Revive is a free-flowing powder, is easy to handle and by virtue of its organic chlorine it is very stable with a long shelf life when stored correctly.

Revive is suitable for use in all water hardnesses.

Revive is supplied in a handy resealable 2.5kg bucket with a dispensing measure.

Revive can also be used as a general dishwashing detergent in an automatic machine where the active chlorine content will help to remove brown stains, especially in tea and coffee cups.

Directions for use: Recommended for use at 0.5 - 1.0% in an automatic machine which is typically one (50g) measure per fresh application (50g per 5 litres water). If bloom on glassware is pronounced it may require several applications before it can be removed.

Caution: Revive is an Irritant - contains sodium metasilicate and sodium dichloroisocyanurate.

SPECIFICATIONS:

| | |
|------------|------------------|
| Colour: | Off white powder |
| Odour: | Faint chlorine |
| Pack Size: | 2.5kg powder |

RINSE AID

For use in automatic glasswashing machines during the final rinse cycle

Rinse Aid will give bright, shiny, spotless and stain free surfaces to glasses.

Rinse Aid is very mildly acidic to combat any hard water deposits forming in the final water rinse – leaves glasses sparkling and stain free.

Directions for use: Add Rinse Aid directly to the glass wash rinse aid reservoir, from which it is automatically dosed by the machine. Please refer to the dishwasher's user instructions manual.

SPECIFICATIONS:

| | |
|-------------|----------------------------|
| Colour: | Clear blue liquid |
| Odour: | bland |
| pH (1% v/v) | 3.3 |
| Pack Size: | 2 X 5 litre 4 x 5 litre |
